**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments, filed 7/28/2010, with respect to independent claims, as amended, have been fully considered and are persuasive.

***Allowable Subject Matter***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter; the claims are allowable because the examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts.
3. Claims 1-22 and 24-26 are allowed over the prior art of records.

For Independent claim 1,

- Prior art has been found to teach "an apparatus comprising a non-volatile read/write memory drive and a processor, wherein the processor is configured to cause the apparatus to at least: use the non-volatile read/write memory drive to boot a single resident operating system of the apparatus, wherein the non-volatile read/write memory, drive is normally used to boot up to a functional graphical user interface (GUI) associated with the single resident operating system; and in an instance in which, during boot, it is determined that the single resident operating system is loaded intact but the non-volatile read/write memory drive is corrupted,...";
- Since, no prior art was found to teach:" automatically swap the non-volatile read/write memory drive with a temporary volatile random access memory (RAM) drive under control of the single resident operating system to thereby enable the

single resident operating system to complete the boot" as it pertains to the other portions of the claim as a whole, in a manner that would motivate a person of ordinary skill in the art at the time the invention was made to combine it as an obvious inclusion,

- The examiner found the invention as claimed to be novel, and allowed it to be patented.

For Independent claims 12 and 26, the claims recite essentially similar or additional limitations as in claim 1, except that claim 12 is a method and claim 26 is a computer program product comprising a computer-readable storage medium bearing computer program code embodied therein for use with a computer;

For dependent claims 2-11, 13-22, and 24-26, the claims are allowed due to their dependency on allowable independent claims 1 and 12.

### ***Conclusion***

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
